Full-Stack Developer with a **mobile-first focus** and **6+ years of experience** building scalable, high-performance applications for fintech, crypto, and enterprise sectors. I leverage **AI-powered tools** for accelerated development, automated testing, and code optimization to deliver secure, maintainable, and robust solutions. Proven expertise in end-to-end systems across a modern tech landscape, including mobile, web, and serverless architectures. I have successfully shipped products used by over **100,000 users**.

TECHNICAL SKILLS

AI Integration / Automation: GitHub Copilot, automated code generation, smart debugging, CI/CD pipeline optimization

Mobile & Cross-Platform: Flutter (iOS, Android, macOS, Linux)

Front-End: React.js, Next.js

Back-End: Node.js, Express.js, RESTful APIs

DevOps: GitHub Actions, Jenkins, Codemagic, CI/CD

Databases & Tools: Firebase, PostgreSQL, MySQL, MongoDB, Docker, Linux, Blockchain

EXPERIENCE

Turing – Full-Stack Developer

Jan 2023 – Present

Vetted and selected by Turing to work with top-tier international clients, delivering production-grade solutions across fintech, crypto, and enterprise industries.

- **Delivered high-impact mobile and web applications** used by tens of thousands of users, focusing on performance, scalability, and a seamless user experience
- **Led the development of Flutter-based cross-platform apps**, reducing development time and maintenance costs for clients by up to 40%
- **Built secure, serverless backend architectures** using Node.js, Firebase, and PostgreSQL — enabling fast deployment cycles and real-time data sync
- **Integrated CI/CD pipelines** using GitHub Actions and Codemagic, resulting in fully automated testing and deployment workflows
- **Collaborated with distributed teams** across time zones using agile methodologies, consistently meeting tight deadlines and exceeding client expectations

Proxify – Flutter Developer

Jan 2022 – Aug 2022

- Optimized "Mash" dating app with Flutter (↑27% speed, ↑20% user satisfaction).
- Built CI/CD pipelines for seamless deployment.
- Reduced crash rate by implementing Provider-based state management.

BitLipa – Tech Lead

Mar 2020 – Sep 2021

- Built web/mobile apps processing \$1M+ in 6 months.
- Integrated blockchain for secure payments.
- Managed cross-functional dev team, aligning tech with business goals.

EDUCATION

Moringa - Software Engineer

Mar 2016 – Sep 2026
